

It's plain and simple... I love working with Bob Whyte. Bob has an excellent eye and "lots of know how" which makes working with him very gratifying.

Naturescape was recommended to me by a neighbor who is in the construction field himself. Their driveway, walks and retaining walls are beautiful and so are mine!

I liked Bob's easy approach, educational manner and enthusiasm from the very start. He was not at all intimidating for me as a woman to talk to regarding the construction details and costs.

Bob and his crew built a beautiful paver driveway and walkway for my home. The work transformed the appearance of my yard.

I was at work during the day so I wasn't around to watch the work's progress but my neighbors commented daily how impressively organized, hard working and efficient his crew was. At night when I got home from work I was delighted with the daily efficiencies, beautiful changes and most importantly the level of communication. Bob called me daily with updates. His pride in his team's work was delightful and inspiring. Bob is a great project manager.

I have planned all my landscape improvements around the work that Bob did and have incorporated all of his recommendations (moved the propane gas tank, painted the garage door red and put in a vegetable garden). I eagerly look forward to future projects with Bob and consider those projects valuable home improvements.

Three years later, I still get regular compliments on how great my yard looks. It is the beautifully designed and crafted drive and walkway that are the foundation of those compliments. My home now has great curb appeal.

I can easily and confidently recommend Bob Whyte's work and I am delighted that my dear friend and new neighbor chose *Naturescape* for her new home. Now there are three beautiful *Naturescape* homes in our neighborhood. No wonder folks love to walk around here!
