

May 24, 2008

Dear Bob,

We just wanted to thank you and your crew for a wonderful job on our pool deck. As you know, we had stampcrete as our pool decking when we installed our pool 4 years ago. Since the deck was sinking beneath us, we needed to repair it somehow. After speaking with you about putting pavers right over the existing stampcrete decking, we became quite interested. You spent several hours at our kitchen table talking about the different options we had. If only we had met you before we paid for our first pool deck of stampcrete.....

It was great that you kept in contact with us during the whole process. You and your crew were always there when you said you would be and if something did come up, you always called. Your crew was very professional. We are extremely happy with our paver pool deck. The new deck dramatically changed the entire feel of our back yard. It is inviting and relaxing.

We will highly recommend *Naturescape* and the paver pool decking.

Sincerely,

Matt and Holly Clancy
