

Let me just start by saying that Naturescapes exceeded every expectation I had for a pool deck. My wife and I were having a one-piece fiberglass pool installed in an area that was previously no more than trees and pine needles. We were thinking concrete decking when I happened to drive by Naturescapes one weekday morning. I told my wife we should check it out on the weekend and that is when we met Bob. He came by the house that very day and came up with some ideas to think over. By the time the pool was completed the Naturescapes crew had put down a beautiful walkway and deck to the pool, put down sod, installed a new fence, mulched, installed a granite post for a lantern, and left the area ready to use. It has now become our summer weekend paradise.

Bob Whyte is so orientated to detail, that he had grassed more area than was contracted for, but when he ran out 5 feet from being totally finished, came back and finished it on his own because it bothered him that it wasn't totally finished.

I was so pleased with the work done I hired Naturescapes to build a retaining wall around a rock that was in my parking lot at my business. Once again the job came out better than expected. Many of my customers have commented on how nice it is. This winter it was hit by a truck and damaged. I called to see what could be done and emailed Bob some pictures of the damage. He called and said it wouldn't be that difficult to fix and sent a crew several days later. The price was more than reasonable. They stand behind their work.

This year I am planning on using them once again to put an irrigation system in my home. I feel that they will do a fine job based on past performance and professionalism.

It was quite by accident that I met Bob, but he has been a great find.

I would highly recommend Naturescapes for any landscaping work you are thinking about. You will not be disappointed.
