

Naturescape, and in particular, Bob Whyte has turned our home into a showcase. We had the basics, modest home, nice lot, a pool and concrete deck, grass, some plants, and a huge sink hole in the middle of the front lawn; too many trees, causing all sorts of problems.

Naturescape came in and transformed our property. Bob knew just what to do to alleviate the problem areas and how to beautify everything. He listened to our wish list, made recommendations, and the end result is more than we could have hoped for. Bob was cognizant of the fact that our budget was a factor, yet he went above and beyond in some areas when he knew it would be the right thing to do, without cost.

Naturescape provided us with complete excavation of our existing lawn, trees, plantings, driveway. They installed irrigation, drip lines for the beds, sod, plantings including trees, and most exciting, paver walkways and paver pool deck.

The workers were polite, neat, energetic and talented. The customer service from Bob was outstanding. We couldn't be more pleased and offer our sincere gratitude to Bob and his employees.
