

In 2004, my wife and I began construction of our dream home on Cape Cod. The process was not without its problems and headaches.

However, when it came to the landscape design in the fall of 2005, things took a big step in the right direction. When we met Bob Whyte, the decision to turn over the design and development of our property was the easiest of all.

Bob and his crew were prompt and thorough. He designed and constructed stone walls, installed paver walkways, paver driveway, dry wells, window wells, granite steps and light columns, irrigation system, lawn installation, and trees, shrubs and perennial plantings.

The entire landscape has matured and we are always being asked about the designer of our property. We are also told that we have the prettiest property in our area.

Bob has maintained contact with us and has always responded to any of our concerns promptly. We can recommend Bob and his crew wholeheartedly and without reservation.
